EXPERIENCE

Software Engineer @ Immersive Softworks, Guadalajara • Sep 2025 – Present

- Develop modern web applications and scalable frontend architectures using Next.js, TypeScript and React.
- Build responsive enterprise interfaces focused on performance, maintainability and user experience.
- Collaborate on the development of scalable internal systems and operational platforms.
- Implement reusable UI systems, secure workflows and modular application structures.

Software Engineer & IT technician @ IMSS, Merida • Oct 2022 – Oct 2023

- Collaborated in the development and implementation of healthcare systems for outpatient consultations and hospitalization workflows.
- Participated in remote patient monitoring solutions used during the COVID-19 pandemic.
- Configured and maintained hospital network infrastructure and technical systems across multiple departments.
- Provided technical troubleshooting and operational support for critical healthcare environments.

IT technician @ Centro de Servicio Multimarcas, Merida • Jun 2019 – Feb 2024

- Provided technical support, maintenance and troubleshooting for computer systems and electronic devices.
- Participated in the implementation of sales and operational systems for electronics and mobile devices.
- Configured local networks, software environments and hardware systems for business operations.
- Designed and developed a Swift-based compiler for embedded systems and medical devices, enabling firmware generation and automated hardware validation workflows.

PROJECTS

MediFlow — Enterprise Hospital Logistics Platform

- Developed a hospital logistics and patient transport management system with real-time monitoring and operational dashboards.
- Implemented WebSocket communication, audit logs, role-based access control and live activity tracking.
- Built scalable backend architecture using NestJS, Prisma and PostgreSQL.
- Tech Stack: Next.js, TypeScript, NestJS, PostgreSQL, Prisma, Socket.IO, Tailwind CSS.

Centro de Servicio Multimarcas — Repair Management Platform

- Built a repair intake and tracking platform for mobile devices with QR tracking and operational workflows.
- Implemented SMS notifications, repair status tracking, dashboard analytics and printable service orders.
- Designed responsive interfaces and modular frontend architecture.
- Tech Stack: Next.js, TypeScript, Prisma, PostgreSQL, Tailwind CSS, shadcn/ui.

Enterprise POS & Inventory System

- Developing an enterprise-style POS and inventory management platform for retail operations.
- Includes inventory tracking, cashier workflows, analytics dashboards, audit logs and role-based permissions.

- Focused on scalable architecture and operational efficiency.
- Tech Stack: Next.js, TypeScript, PostgreSQL, Prisma, Tailwind CSS

EDUCATION

UTEL — **Computer Science, 2027**

Google by Coursera — **User Experience Design, 2022**

SKILLS

Programming Languages: Java, Typescript, Python, C++, C, HTML, CSS ,PHP.

Frameworks: NextJS, React, , Angular, Vue, TailwindCSS.

Backend: Node.js, NestJS, REST APIs, Authentication, WebSockets.

Concepts: .System Architecture, Real-Time Systems, RBAC, Responsive Design, Enterprise Dashboards, Performance Optimization.

Tools: Prisma, Docker, Glt, GitHub, Linux.

Languages: Spanish (Native), English (Profesional working proficiency).

Databases: Oracle, PostgreSQL.
